

THE WORK AFTER THE VISIT

● 18:02 · Last patient seen

57.8
hours a week.

Not all of it is medicine.

I. THE SECOND SHIFT

The consultation is only part of the work.

When the last patient leaves, a second workload begins. It rarely appears on the rota, yet every piece of it carries clinical responsibility.

II. AFTER EVERY VISIT

Four tasks remain.

CONSULTATION · COMPLETE		17:40
The note	● Documented in full	
The letter	● Written, checked, signed	
The follow-up	● Next steps for the patient	
The booking	● Next appointment arranged	

Each one is essential. None of them appears on the rota.

THE PROFESSION HAS MOVED

Most physicians already use AI at work.

Use has more than doubled since 2023, and most who use it rely on it every day.^{1,2}

And 85% want a say in how it comes into their practice.

1

BURNOUT

Clinician burnout, before and after 30 days with an ambient AI scribe.

- 263 clinicians
- 6 US health systems
- No control group

CONTROL BUILDS TRUST

People abandon an
algorithm after one visible
mistake.

But they keep using an imperfect one when they can
change its output.

PREPARED BY WAI
